A gleaming chain strap gives ladylike bags — from velvet to leather — the elegance of fine jewelry

Bag designer and socialite **Nicky Hilton** knows the secret of taking a denim skirt and tank from boring to brilliant: Throw a chain strap bag into the mix (by Gucci, in her case). In keeping with this season's ladylike clothing, accessories are more luxurious than ever, and a slinky chain is the perfect complement to a purse made from a decadent skin like crocodile. The best part is, they're surprisingly versatile: "You can wear [them] with anything, from a suit to jeans," says celebrity stylist **Danna Weiss**.
